Our Mission:

To reclaim Denver's streets for people.

Our Vision:

Denver's streets are designed for people and foster health, happiness, and opportunity for all.

SAFE STREETS FOR ALL

A strategy to eliminate all traffic fatalities and severe injuries, while increasing safe, healthy, equitable mobility for all.

Traffic Fatalities in Denver

Traffic Fatalities in Denver

In Denver, compared to a motorist:

Pedestrians are approximately **30 times** more likely to die in a crash

Motorcyclists are nearly **13 times** more likely to die in a crash

Bicyclists are **6.5 times** more likely to die in a crash

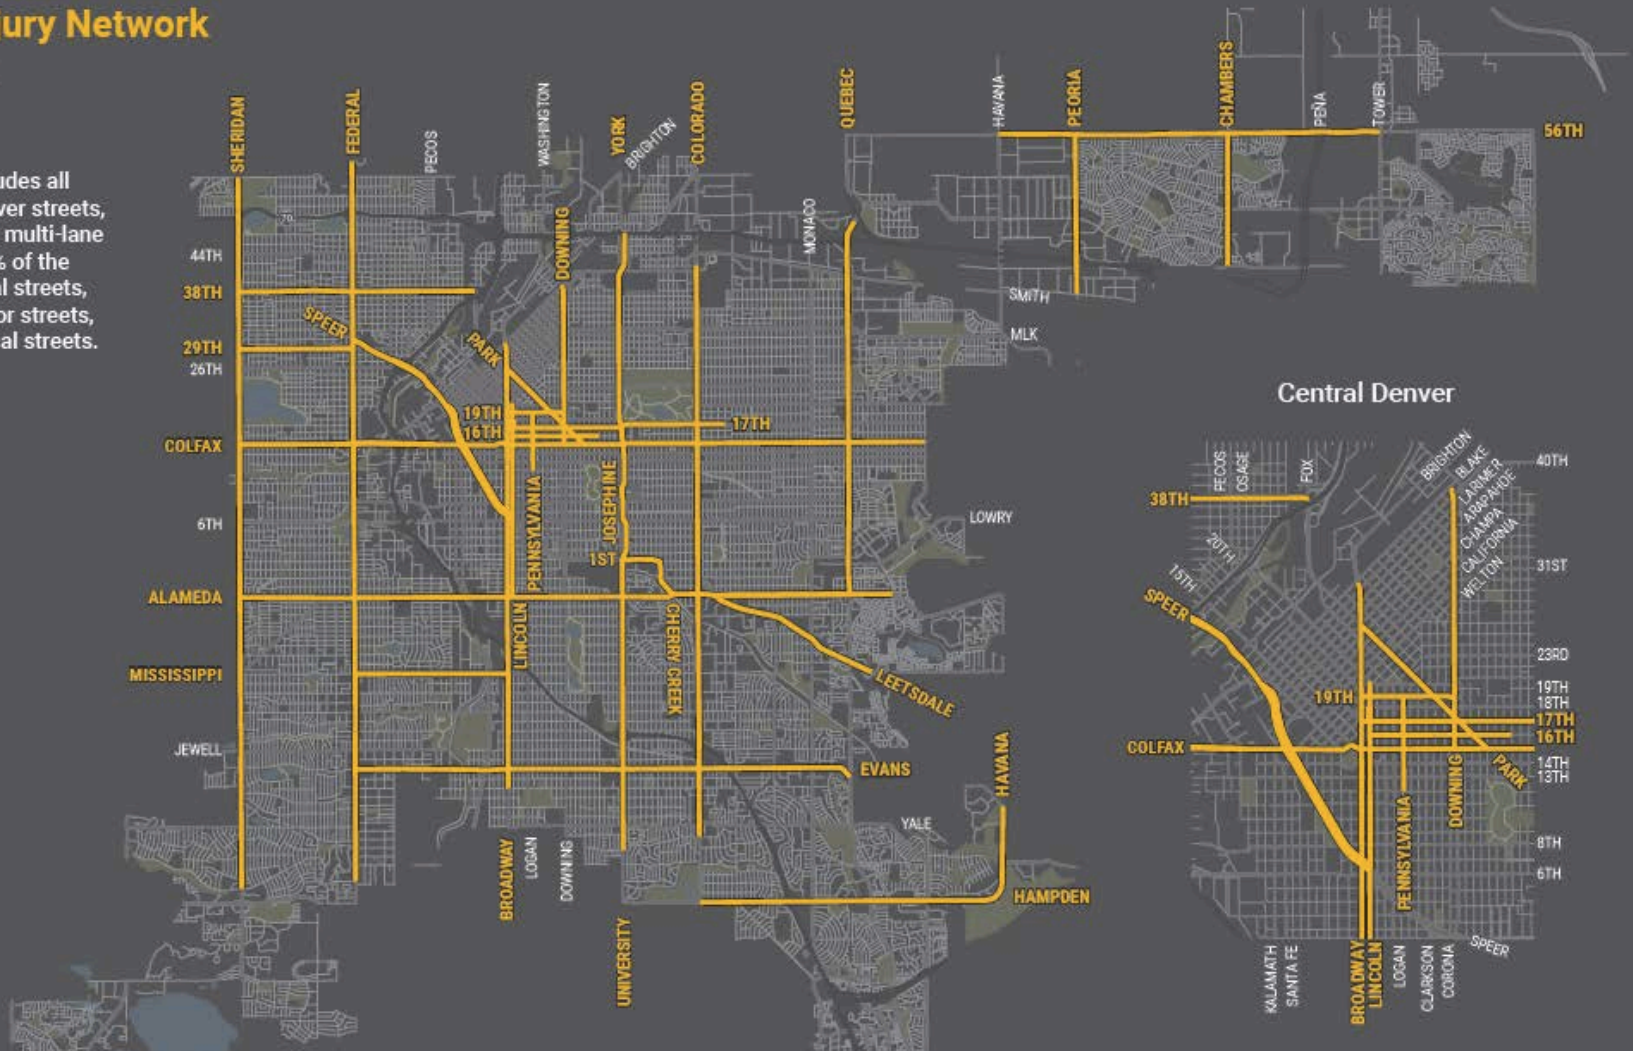

Source: DPW

Denver's High Injury Network: 5% of streets, 50% of fatalities

High Injury Network

All Modes

The HIN includes all types of Denver streets, but is mostly multi-lane arterials. 96% of the HIN is arterial streets, 1% is collector streets, and 3% is local streets.

Who Is Searched, and Who Has Contraband

In four states that best track stops, blacks were more likely to be searched with their consent than whites, even though the police found contraband less often.

Vision Zero and Equity

The **chance black drivers who were searched had contraband**, compared with white drivers.

Of these jurisdictions, only the Rhode Island State Police found contraband more often among blacks.

Vision Zero and Equity

Growth of a traffic ticket

How an unpaid speeding ticket in Oregon grows over 110 days.

VZ Coalition Core Principle: Every person matters

Streets are for everyone, regardless of age, income, race, ethnicity, or ability

VZ Coalition Core Principle: Enforcement cannot correct for dangerous street design

DENVER VISION ZERO ACTION PLAN

Equity Considerations

- Focus on street design along the High Injury Network and within Communities of Concern
- Increase use of automated enforcement, paired with warning signs
- Pilot a “diversion program” instead of increasing traffic fines

**VISION
ZERO**

NO MORE TRAFFIC DEATHS

DENVER
THE MILE HIGH CITY

October 2017

Focus on Street Design: Silverman Park Pop-Up Traffic Calming

- Pop-up crosswalks and mini traffic circle at park entrance
- 58% of drivers over the speed limit before event vs 9% during
- DPD followed up with enforcement, issued 600 tickets in just two days
- DPW now studying road diets in the neighborhood

Automated enforcement is unbiased

Photo speed radar

Red light cameras

Automated enforcement saves lives

- A review of 28 U.S. and international studies found in areas with speed cameras:
 - All crashes **decreased 8% - 49%**
 - Injury crashes **decreased 8% - 50%**
 - Fatalities and serious injuries **decreased 11% - 44%**
- Large cities with red light cameras between 2004 and 2008 saw a 24% reduction in fatal red light running crashes compared to those without

Automated enforcement best practices

- Focus on most dangerous locations
- Don't surprise drivers
 - Pair with signage
 - Use in consistent/widespread manner
- Goal is to reduce speeds/red light running and ultimately have no violations

State law often hampers efficacy and equity of automated enforcement

In Colorado, speed cameras are:

- Banned on most of the High Injury Network
 - Limited to residential areas, schools, parks, construction zones
- Not truly automated
 - Officer must be present during operation
 - Less effective at changing behavior, more tickets issued
