8:30 – 10:00am	Aging Urban Highways	<i>Earhart</i>
	The current administration has called attention to the harmful impacts of highways in cities and encouraged many state DOTs to consider how they can better balance regional mobility with local connectivity and community health, partly through its Reconnecting Communities program. This session will be an opportunity to learn more about how states are implementing innovative highway projects and discuss the inherent benefits and challenges.	

10:15 – 11:45am	Fostering Relationships with Allies and Advocates	<i>Earhart</i>
	<p>Transportation agencies, political leaders, allies, and advocates are all working toward their vision of a modern transportation system, but often end up talking past each other and working at odds. Hear about challenges other states have faced and learn ways to engage with the public and foster more productive relationships.</p>	
12:00 – 1:30pm	Lunch and Report from SSTI	<i>Earhart</i>
1:30 – 3:00pm	Advancing Equity Among State DOTs	<i>Earhart</i>
	<p>Equity has been a consistent theme at past Community of Practice meetings, with issues ranging from hiring and contracting to traffic enforcement. With more agencies making institutional commitments to equity, this discussion will focus on what operationalizing equity looks like in practice and where agencies still have more work to do.</p>
